NOTE: The manufacturer and supplier take responsibility for the products quality, provided it is being sold in its original packing. The use recommendations are based on trials in which the product has been tested. The manufacturer and supplier have no control over factors influencing the products efficiency such as time and method of application, weather conditions, crop characteristics combinations with other chemicals not recommended in the label and other factors influencing the products efficiency. Use instructions should be followed carefully, or else the buyer shall be responsible for the proper storage and usage and for all dangers inflicted by using the product incorrectly. In any case, retailer will not be responsible for the direct or indirect consequences arising from treatment that was not according to the label instructions.

DORNIM contains a unique mixture of adulticide with IGR (Insect Growth Regulator).

DORNIM is active against moth larvae, mites and various kinds of thrips.

Use instructions:

Spray solution preparation: Shake well before use.

For spraying, measure the recommended quantity of **DORNIM** and mix with a little water. Add gradually the required quantity of water to the half-filled spray container while stirring, and then fill the rest of the required water.

Application instructions:

crop	insect	Concentration when spraying to run (%)	Spray solution dosage in ml per 1000m ² (low volume spray to run)	withholding period before harvest
Cabbage/ cauliflower	Cabbage moth, Tobacco thrips	100 ml per 1000m ²	30 – 70 L per 1000m ²	3 days

Warning:

Harmful if swallowed or inhaled.

Safety measures:

During application, the operator should use protective goggles, appropriate long sleeved cloths and gloves for handling chemicals.

Contact between the solution and skin or eyes should be avoided, as well as its inhaling or swallowing.

Do not eat or drink while handling the product.

Environmental safety:

The product is poisonous to marine animals; care should be taken not to contaminate water sources.

Do not spray close to fish ponds or water sources, make sure left-over product or rinsing water do not contaminate fish ponds.

The product is poisonous to bees; do not apply when bees are active in the area.

Following Application:

Cleaning spray equipment:

Rinse with clean water and detergent after use. Do not contaminate water sources. Prevent the product, spilled material, or rinsing water from entering water bodies supplying water to fish.

Personal protection:

Wash with water and soap and change clothes

Re-entry to treated area: only after the solution has dried.

Storage:

Store DORNIM in its original packing in locked chemicals shed, away of the reach of children and unauthorized personnel. Keep away from human or animal feeds.

Treating spilled material:

Absorb liquid spills with inert material such as earth or sand and place in waste containers. Wash area with water and absorb with further inert material. Dispose of safely.

Disposal of empty containers:

Ensure the container is empty. Triple rinse empty container and add the residue to the spray tank. Puncture empty container and dispose of at an approved landfill or other approved disposal facility.

First Aid:

If swallowed, contact a doctor immediately to obtain medical attention.

If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water. If concentrate is splashed in the eye, flush with running water for at least 15 minutes. If inhaled move the victim to fresh air immediately.
